Simulation Visual System Maintenance, Repair & Overhaul

World-Class services

- **REACH. TREALITY SVS** has deployed and/or maintains visual systems in over 30 countries.

- **EXPERTISE. We have** delivered over 3500 projectors as part of our industry-leading visual systems.

- **RELIABILITY. We understand** the need to keep visual systems running at peak performance.

- **INNOVATION. Our** proprietary SIMCAD design tool allows us to effectively overhaul and extend the life of existing simulators.
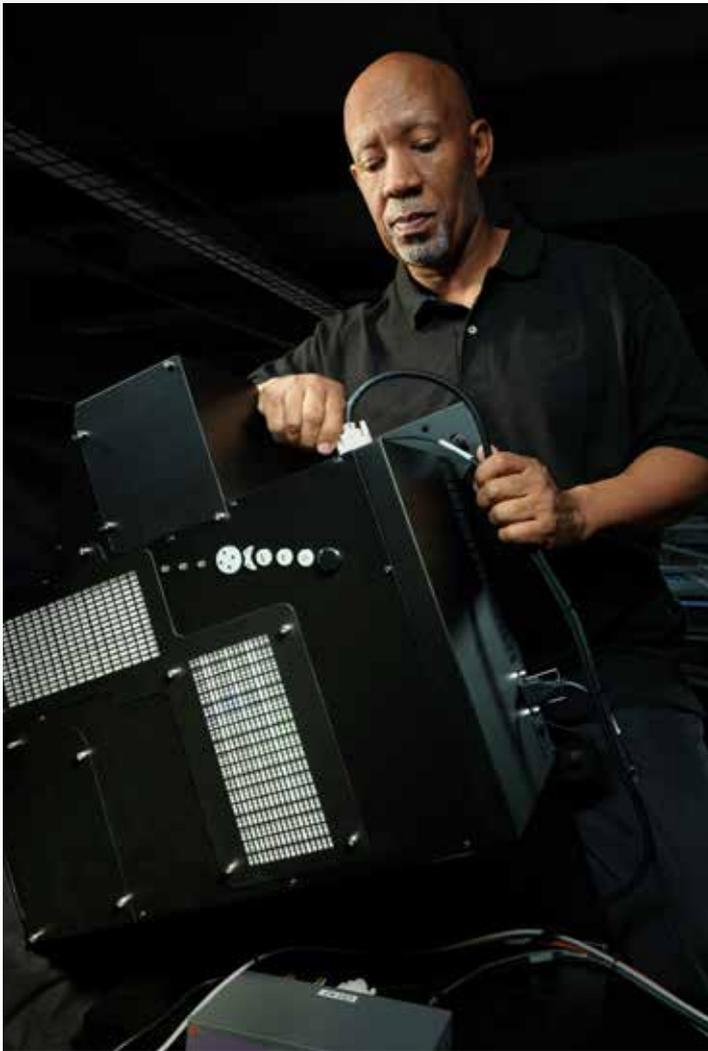

TREALITY Simulation Visual System (SVS) takes visual systems MRO seriously. Providing customer support and offering a wide range of customized service level agreements have been core activities for over two decades. It's our mission to provide comfort and trust that your visual displays are in the hands of the industry experts; de-risking operations, providing predictable OPEX, and securing optimal display performance to end-users.

Our business focus is to help our customers achieve greater productivity, higher precision, and better overall performance. As additional services, TREALITY Simulation Visual Systems can manage and provide periodical obsolescence status reports for specific product platforms or system configurations. Such reports provide a clear and detailed view on the serviceability and support horizon for your visual displays. It provides information as to Last Time Buy decisions for spare parts, consumables and guidance to overhaul and replacement decision.

Broadest portfolio of visual solutions for simulation and training

TREALITY SVS is the only independent turnkey display system provider, and as such we focus on the complete visual solution for our customers. We handle projects from conceptual design through all stages of engineering, manufacturing, installation, and integration. We then provide maintenance support long after a product's end of life. By tailoring the system to your requirements and assuming responsibility through every step of the system's lifecycle, we guarantee not only optimal visual quality but also maximum reliability at the lowest total lifecycle cost.

Our turnkey visualization systems are built using high-quality, TREALITY-designed products. From our broad portfolio, we select the components that best match your requirements to build exactly the systems you need. We consult the customer during the life-time of the visual display and support MRO activities with decades of experience.

If you are curious to hear how we can optimize or upgrade your simulator, or extend its lifetime beyond what you deemed possible. Please contact TREALITY Simulation Visual System's support or sales organization for more information.
